Juan Luis Soto Martinez

Integration Specialist | Dynamics 365 Business Central
Monterrey, Nuevo León, Mexico | jlusomart@gmail.com
linkedin.com/in/grandeotos | github.com/grandeotos

Professional Summary

Integration specialist with 4+ years in software and backend development. Author of 20+ AL extensions and responsible for connecting ERP, e-commerce, and PIM through APIs and Azure. Highest-level technical escalation point for the systems area and a reference for complex Business Central incidents. Global Tenant Administrator for Microsoft 365 / Entra ID.

Professional Experience

ARTEXA México | Integration Specialist
Monterrey, Nuevo León — Jul 2026 – Present

- Lead the highest-level technical escalation for the systems area and enterprise systems integration and continuous improvement, centered on Business Central.
- Designing (in progress) automated payment reconciliation: document reference, bank file parsing, and advance exposure through an API.
- Support coordination and data extraction for the multi-company Business Central migration and legacy ERP systems migration to the cloud, alongside an external consultancy.
- Administer Azure infrastructure and the Microsoft 365 / Entra ID tenant; provide technical oversight of software, mentor a junior developer, and author operational guides for sales and order fulfillment.

ARTEXA México | Senior Software Developer — Remote · Jul 2024 – Jun 2026

- Developed and maintained 20+ Business Central extensions in AL (reporting, integrations, workflow automation, and business process customization) and administered the ERP.
- Led the backend integration for **ArtexaPRO**: connecting Adobe Commerce with Business Central for orders, inventory, and product data, including the V2 optimization of the order retrieval service.
- Designed a **central integration layer (API Gateway)** that unifies Business Central, the online store, and the product catalog into a single access point, simplifying system-to-system connections.
- Identified and fixed the root cause of data corruption in the Business Central posting engine (reservation entries and fiscal integrity), building AL tools for remediation.
- Supported the Azure subscription migration (PAYG to CSP, in progress), the transactional email migration to Azure Communication Services, and the evolution of a generative assistant in production (catalog, pricing, logistics, invoicing).

ARTEXA México | Junior Software Developer — Remote · Jun 2023 – Jul 2024
Developed AL extensions and customized Business Central reports and invoices; assisted with user setup and IT support.

ARTEXA México | Software Developer Intern — Remote · Dec 2022 – Jun 2023

Clik Graphics | Backend Developer — Jul 2022 – Oct 2022
Developed REST APIs using NestJS, TypeScript, and TypeORM; assisted with a legacy database migration.

OMRI Tech | Backend Developer — Aug 2021 – Feb 2022
Developed and maintained an LMS platform and websites using PHP, Laravel, and WordPress.
